Section 5. Fire-Fighting Measures

Extinguishing Media: Use foam, water spray or fog, dry chemical or carbon dioxide.

Hazardous Combustion/Decomposition Products:

Carbon oxides Combustible. Vapors are heavier than air and may spread along floors. Forms explosive mixtures with air on intense heating. Development of hazardous combustion gases or vapours possible in the event of fire. Risk of dust explosion.

Special Protective Equipment for Firefighters: As in any fire, fire fighter should wear positive pressure self-contained breathing apparatus.

Further information: Prevent fire extinguishing water from contaminating surface water or the ground water system..

Section 6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures: Ventilation. Collect leaking and spilled liquid in covered containers as far as possible. Absorb remaining liquid in sand or inert absorbent. Then store and dispose of according to local regulations. Personal protection: filter respirator for organic vapours of low boiling point adapted to the airborne concentration of the substance. Use personal protection equipment recommended in section 8.

Environmental precautions: Prevent further spillage or leakage if it is safe to do so. Do not let the chemical enter drains. Discharge into the environment must be avoided.

Methods and materials for containment and cleaning up: Collect and arrange disposal. Keep the chemical in suitable and closed containers for disposal. Remove all sources of ignition. Use spark-proof tools
